SPECIES NAME CHANGES

The following names changes for species of the epiphytic genera have been published in the *American Journal of Botany* and will probably be accepted. The exception may be changing *Hatiora epiphylloides* to *Schlumbergera lutea*. DNA studies show that *Hatiora epiphylloides* belongs in the Genus *Schlumbergera* but the flower morphology of *Hatiora epiphylloides* does not match any of the *Schlumbergera* flowers. Dr Kohlschrieber, Registration Committee Chair, suggests that if you have any of these plants, to put a name tag in your plant with the new name but still keep your old name tag.

Hatiora epiphylloides* = *Schlumbergera lutea

Hatiora epiphylloides* ssp. *epiphylloides* = *Schlumbergera lutea* ssp. *lutea
